13. Close the dead hours in the worst timetables

10 group(s) have a gap of 4 hours or more; the worst (GM G) waits 10h 5m.

Do this: Move one session of the affected groups into the middle of the day, or accept the gap and give those groups something to do in it. A gap this long is dead time the students pay for in travel and in nothing else.

affects 10 group(s) · 300 student-attendances · 234.3 student-hours

- GM G: 10h 5m at worst, 2005 dead of 610.0000000000001 contact minutes
- CE A1: 6h 5m at worst, 1235 dead of 1350.0 contact minutes
- CE A2: 6h 5m at worst, 1490 dead of 1349.9999999999998 contact minutes

14. Give the worst timetables a lighter week

Post-Align group(s) score lowest on the timetable index: 0 of them can be improved by moving into a session that already exists.

Do this: Each row lists sessions that group is already eligible for, on a day it has free, in a room that holds it. Move a group into one and its dead time drops; where no option is listed, the group has no alternative class and needs a new session rather than a different one.

15. Take teaching off Tuesday

Tuesday carries 108.0 student-hours against 62.1 on Friday -- 42% heavier.

Do this: Move about 22.9 student-hours of practical or elective work from Tuesday to Friday, and check the bands in use on Tuesday against the rooms available then.

affects 0 group(s) · 0 student-attendances · 45.9 student-hours

- Monday: 91.8 student-hours
- Tuesday: 108.0 student-hours
- Wednesday: 68.8 student-hours
- Thursday: 93.0 student-hours
- Friday: 62.1 student-hours

16. Stop booking small classes into the largest halls

7 room(s) average under 35% seat utilisation, about 1620 seats unused across their classes; B2-2 is the widest gap at 11%.

Do this:

Point B2-2 at smaller classes, or release it for whole-cohort lectures. A room that seats 284 and averages 11% full is available capacity the faculty is not using.

affects 0 group(s) · 600 student-attendances · 18.6 student-hours
